

# **HOW TO CONNECT A DEVICE IN CABLE FREE ROOMS**

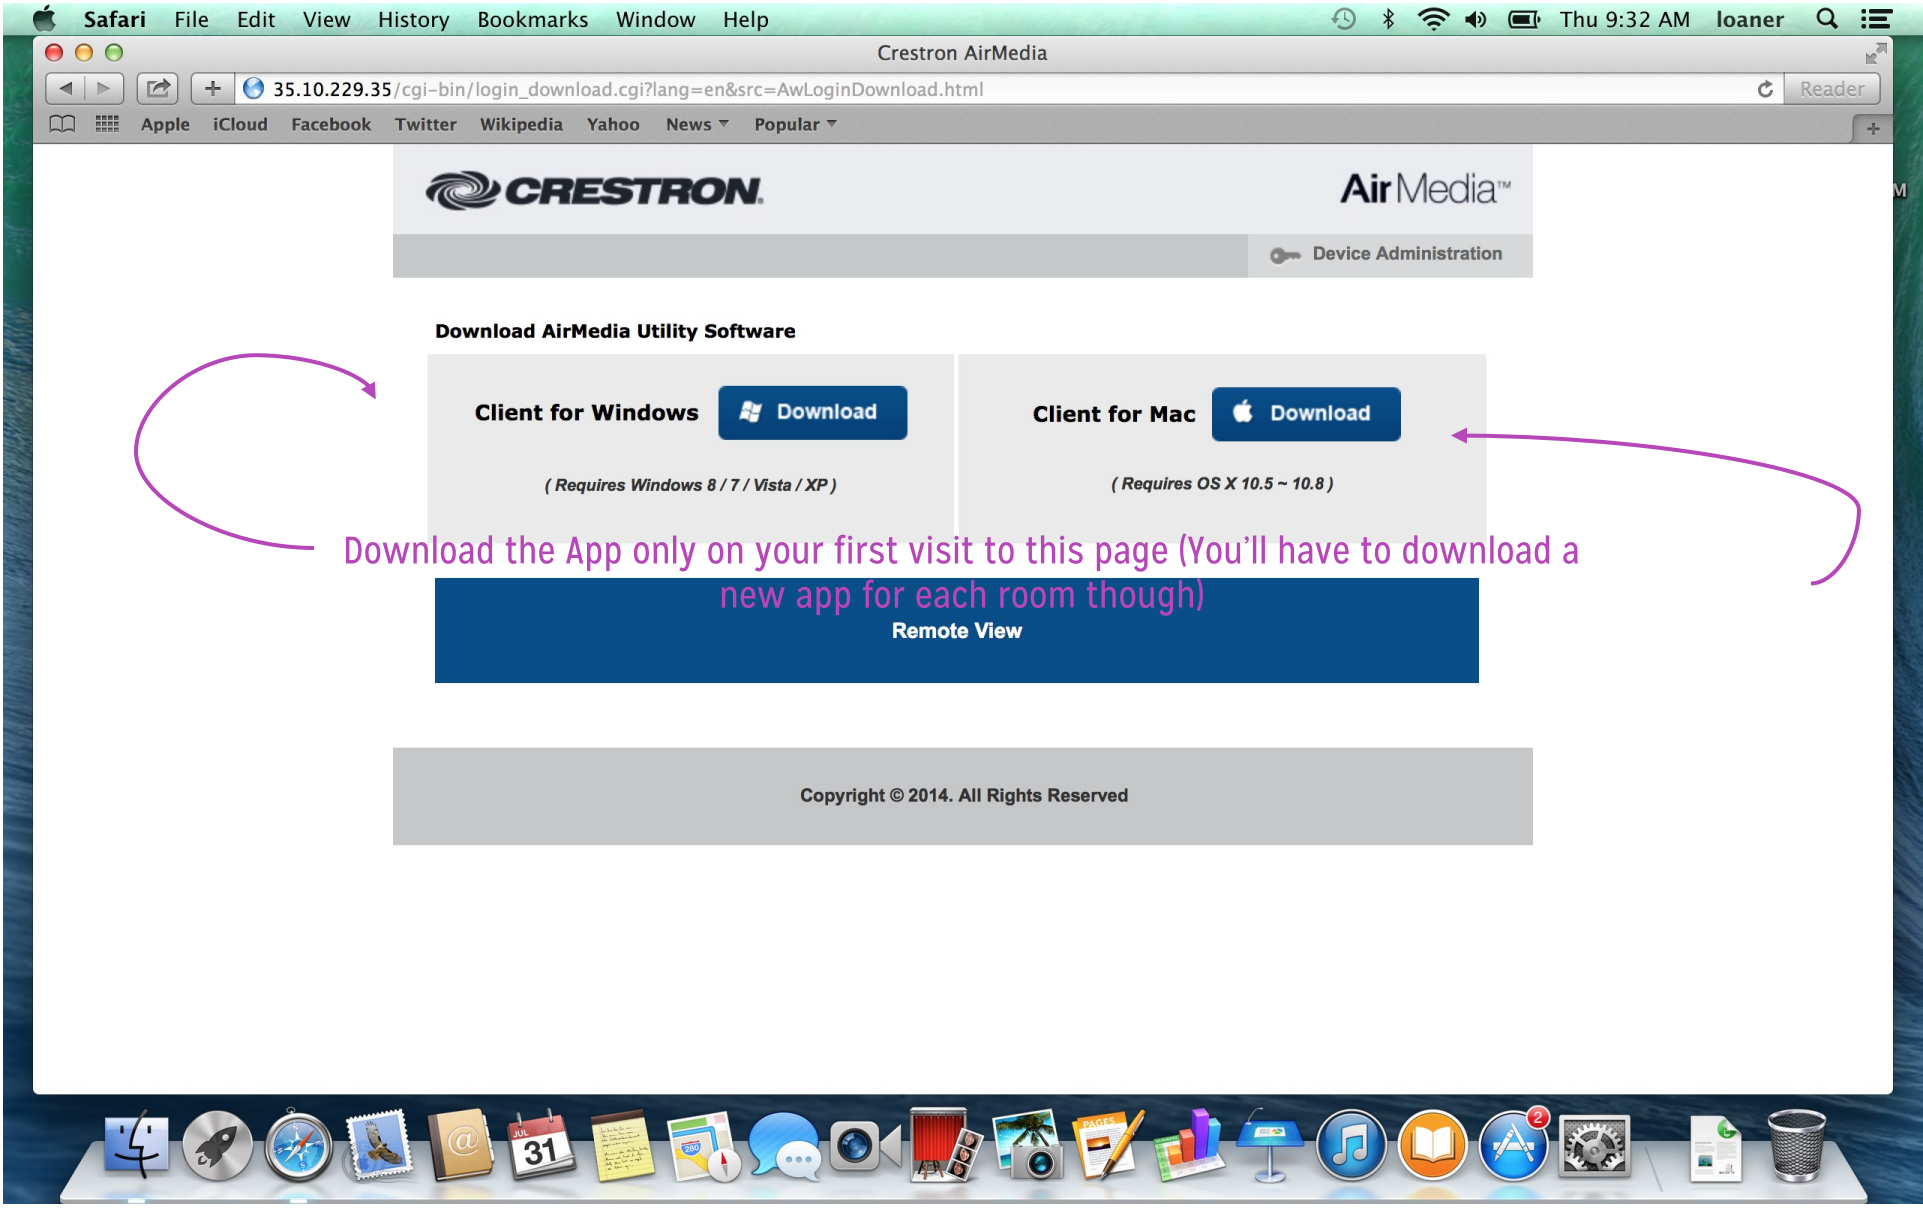

*Currently Available in All 3rd Floor Classrooms*

EXCEPT Room 324

On the touch panel in the room:

Enter the IP address shown on the screen into your browser  
(each room will have a different IP address!)

**CRESTRON**

**AirMedia™**

Device Administration

**Download AirMedia Utility Software**

**Client for Windows**

 **Download**

*( Requires Windows 8 / 7 / Vista / XP )*

**Client for Mac**

 **Download**

*( Requires OS X 10.5 ~ 10.8 )*

Download the App only on your first visit to this page (You'll have to download a new app for each room though)

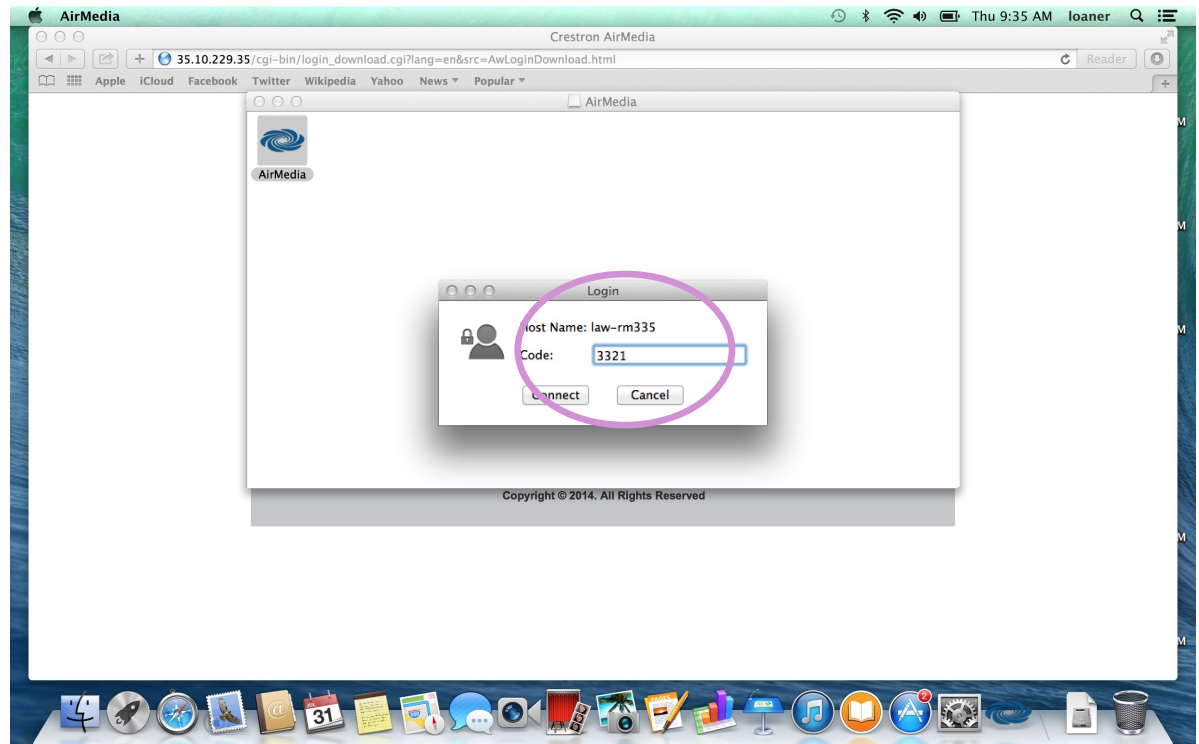

**Remote View**

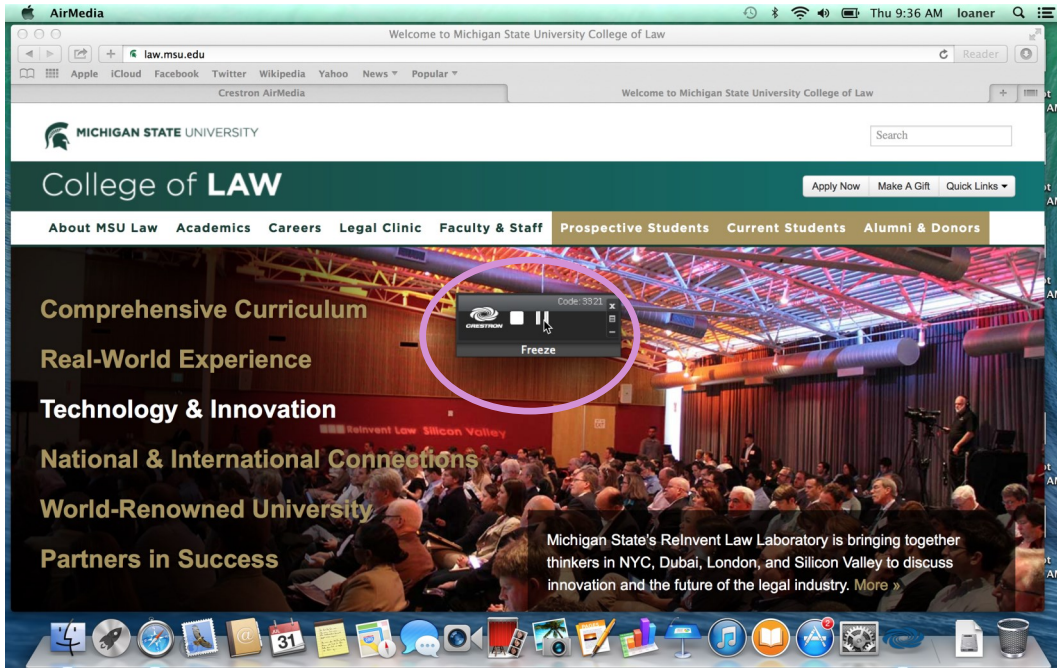

Copyright © 2014. All Rights Reserved

After downloading the App, double click to open.

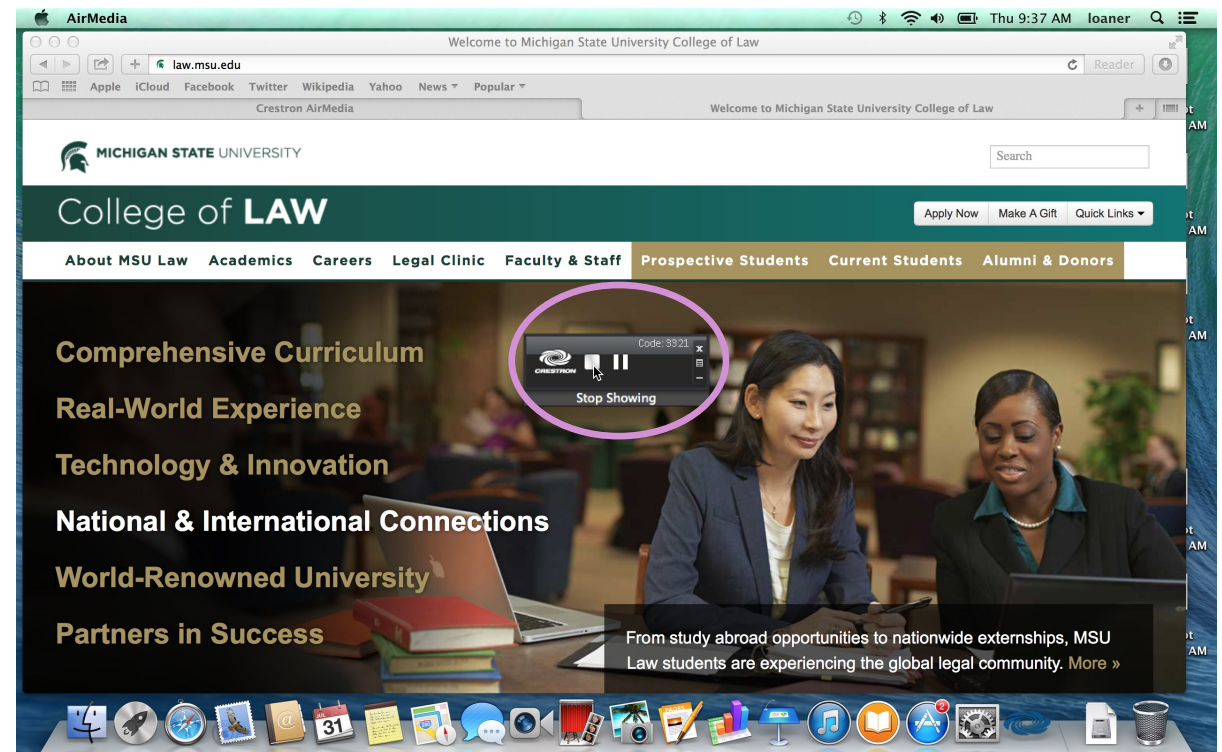

This box will appear. Enter the four digit code that you see on the projector screen to the right of the IP Address.

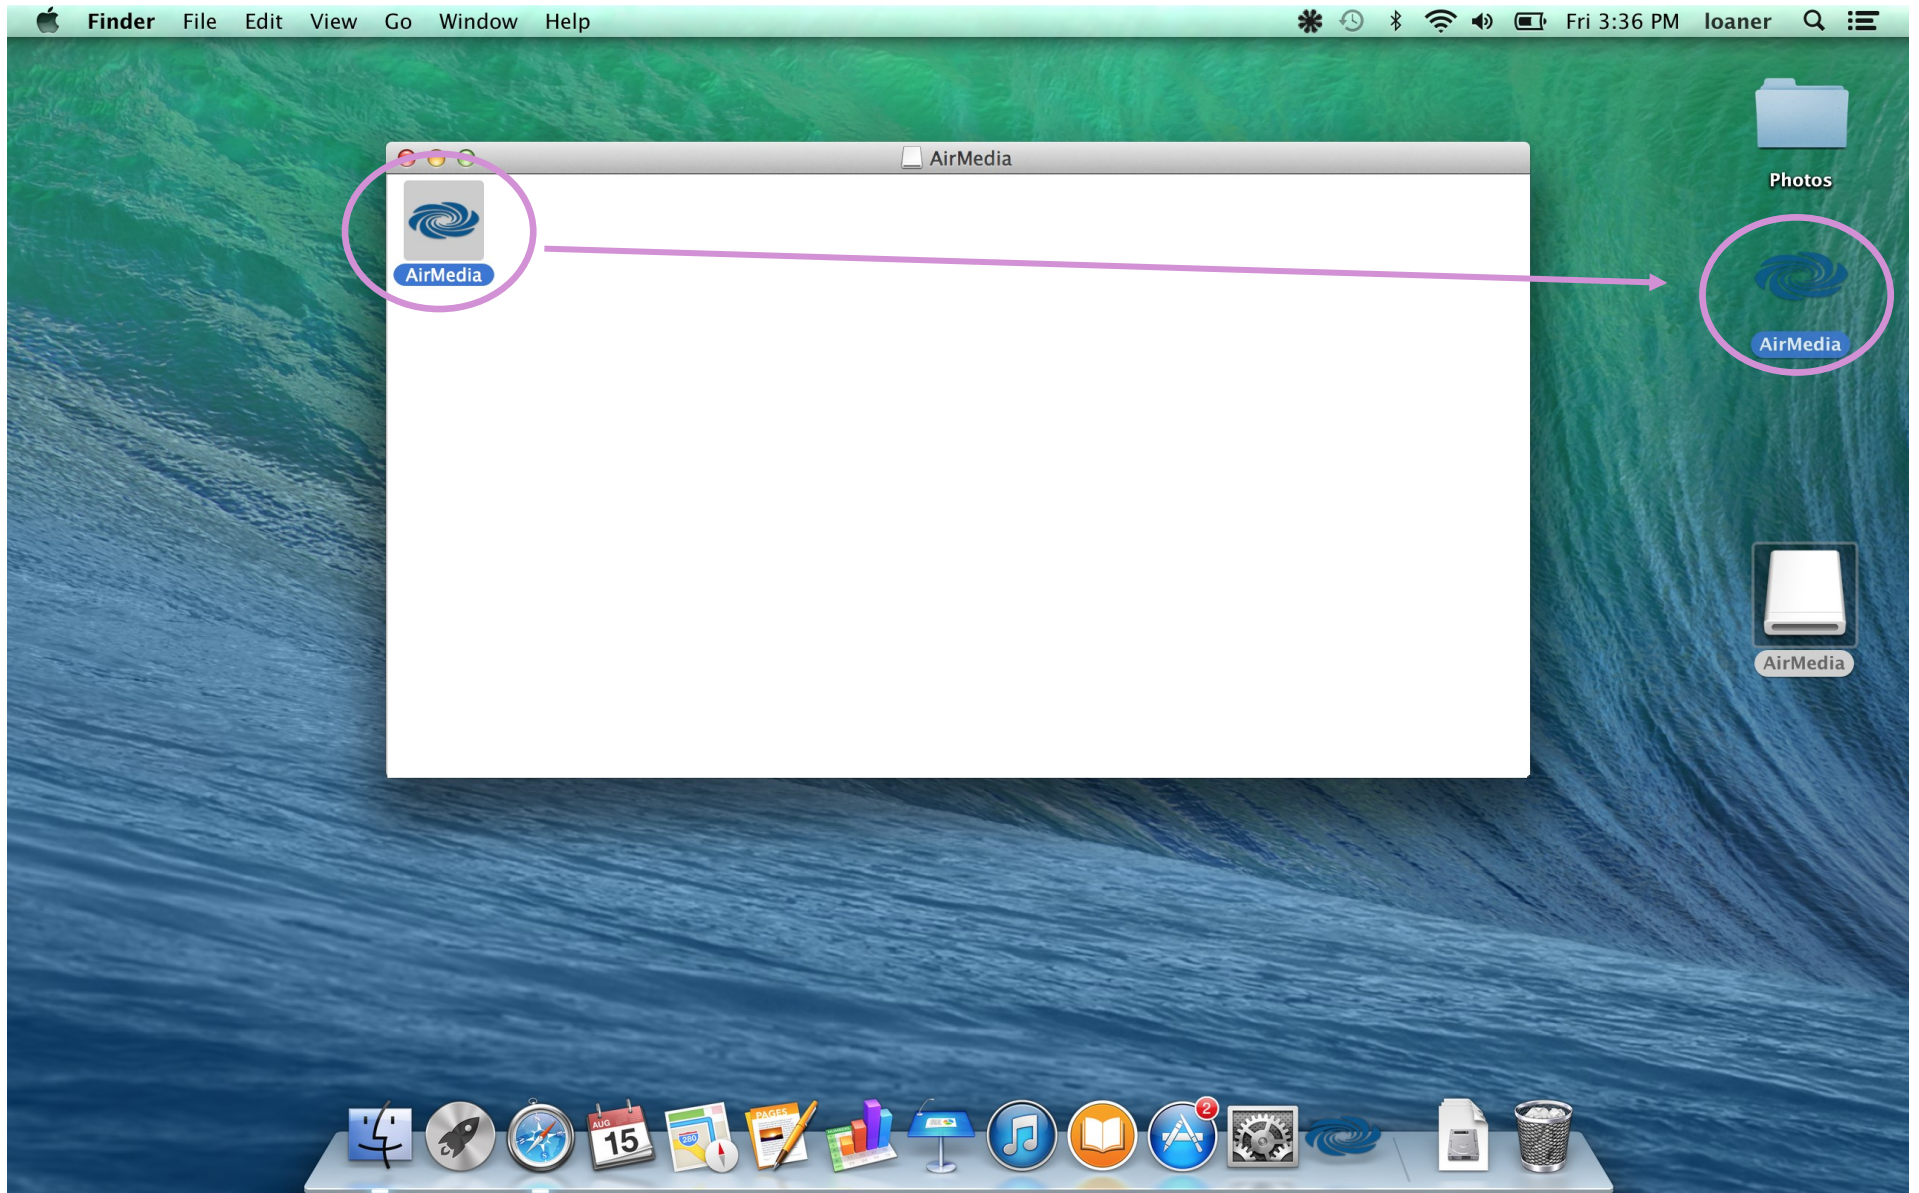

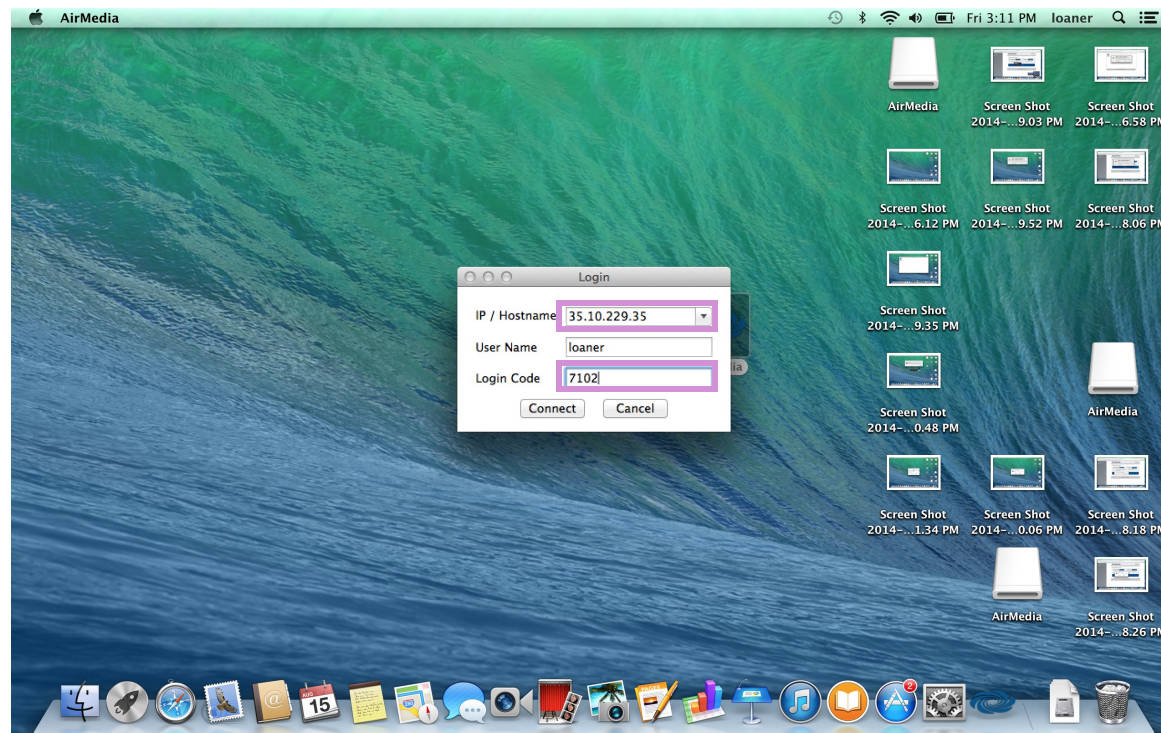

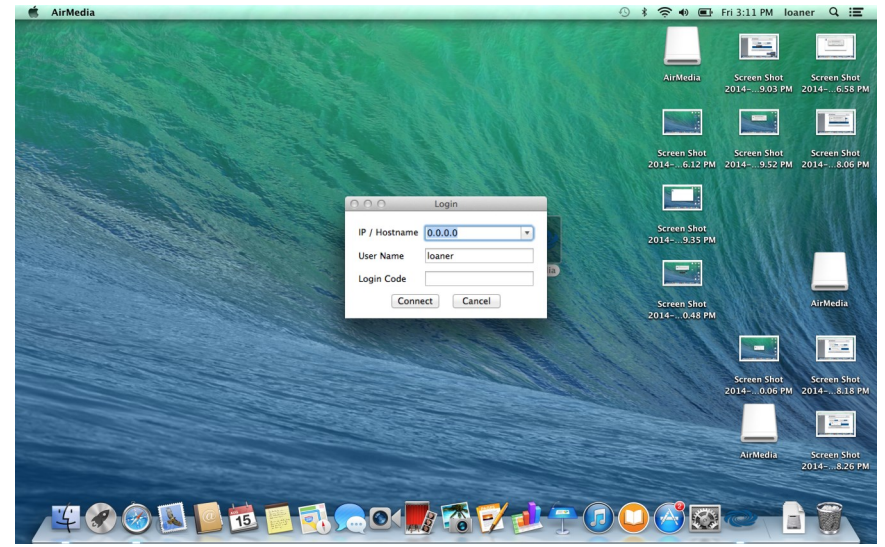

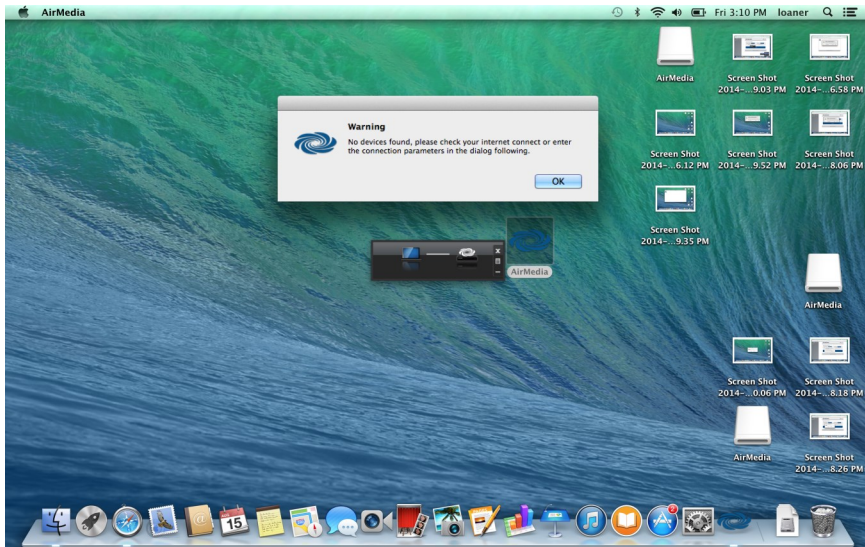

The projector screen will now match your device screen. To “freeze” the projector screen, to use your laptop screen without displaying it, simply click the Freeze button. To unfreeze the screen, click the button again.

To stop sharing your device screen altogether, click the Stop Sharing button.

Make Sure to Keep the AirMedia App on your desktop for further use!

**After you've downloaded the application from the web for all the rooms you will use, when opening air media, double click the icon and click "okay" when the warning comes up "Unable to Find Devices". Enter the IP Address on the screen as well as the code to begin sharing your screen!**
